

Harvest management recommendations in the uplands

Harvest panicles at least 85% maturity, thresh immediately and dry to 14% moisture content (MC) for milling and 12% MC for planting.

Storage

Clean and store seeds in air-tight, cool, dry, and rodent-proof containers.

Super Grain Bag

- Hermetic (water- and gas-tight), enables control of insects without the use of chemicals, prevents mold growth, and maintains seed germination
- UV-resistant and can be installed indoors or outdoors
- Portable, needs minimal structure needed, and easy to install
